

MAE is a dilute form of Hydrochloric acid. The product has a set dilution for maximum reactivity with floors such as concrete sand/cement screeds, and marbles

PACKAGING

5L and 25L

PRODUCT USES

- Etch for concrete based floors to provide a key prior to painting.
- Brick Cleaner

HEALTH & SAFETY

Please refer to our H/S Data sheet

APPLICATION

- Pour and spread across the floor with a brush or squeegee. This will produce a fizzing on the substrate surface. When the fizzing has subsided, wash the floor clean with cold water.
- Allow the floor to dry, prior to painting. A wet vacuum may be used to quicken the drying process.

Morgan Polymers Ltd can give no product guarantee (either written or implied) due to the fact that application techniques vary and are totally outside their control.

COVERAGE RATES

50m²/ 5L
