

Bauxite or Aluminium Oxide, to use the chemical name for the aggregate, is a hard-wearing aggregate of an even particle size. This particle size accuracy makes the product an ideal anti slip/ anti skid dressing for Coatings.

#### GRADES

Superfine	0.4-0.6mm
Fine	0.7-1.2mm

#### PRODUCT ATTRIBUTES

- High crushing strength and hardness Mohs scale 7-8.
- Good particle size distribution.
- Dry and easy to apply.
- Forms an even density anti slip surface.

#### HEALTH & SAFETY

Keep out of the reach of children and refrain from inhaling dust.

*Morgan Polymers Ltd can give no product guarantee (either written or implied) due to the fact that application techniques vary and are totally outside their control.*

#### COLOURS

Sand to light grey

#### COVERAGE

Full Scatter	1Kg per m <sup>2</sup>
Partial pepper pot	250grams per m <sup>2</sup>

#### MIXING AND APPLICATION

Scatter into first coat of paint, and seal in when dry with second coat of paint. Alternatively, leave exposed in first coat of paint if required.
