

Epoxy scratch patch is a 3pack solvent free self-smoothing repair mortar, normally used to repair floors prior to painting over. The product is low in odour and food safe.

PRODUCT ATTRIBUTES

- Can be used on feather edge repairs
- Can be poured into holes 0-10mm in depth.
- Can be used as a bolt hole sealer
- Can be used as a grout for setting floor bolts.
- Can be over painted with Epoxy resin coatings.

COLOURS

Sand

MIXING AND APPLICATION

- The repair area must be clean dry and grease free. Loose dust must be removed with a vacuum
- Mix base and reactor thoroughly prior to use. A paddle attached to a drill is suitable for this purpose.
- Add the aggregate pack whilst stirring, the large bucket will accommodate this mixing procedure.
- After stirring, pour into the repair and level if necessary with a metal float.
